

MediMind AI - Clinical Report Summary

Analysis Date: 2026-06-12 12:07:14

Comprehensive Health Analysis

Patient Information

- **Name:** Auditor
- **Age:** Not specified
- **Gender:** Not specified
- **Date:** 2026-01-10 and 2026-06-10

Diagnoses & Key Findings

Based on the lab results, there are no specific diagnoses mentioned in the clinical notes. However, the lab results suggest potential issues with glucose, cholesterol, and liver function.

Medications Listed

Not specified in the clinical notes.

Lab Assessment

The patient underwent two lab assessments on 2026-01-10 and 2026-06-10.

Extracted Lab Metrics

2026-01-10

Metric Value Normal Range		
--- --- ---		
Glucose	125.0 mg/dL	70-100 mg/dL
Cholesterol	220.0 mg/dL	< 200 mg/dL
Creatinine	1.1 mg/dL	0.6-1.2 mg/dL
Hemoglobin	12.8 g/dL	13.5-17.5 g/dL
ALT	48 U/L	0-40 U/L

2026-06-10

| Metric | Value | Normal Range |

| --- | --- | --- |

| **Glucose** | 110.0 mg/dL | 70-100 mg/dL |

| **Cholesterol** | 195.0 mg/dL | < 200 mg/dL |

| **Creatinine** | 0.9 mg/dL | 0.6-1.2 mg/dL |

| **Hemoglobin** | 13.5 g/dL | 13.5-17.5 g/dL |

| **ALT** | 32 U/L | 0-40 U/L |

Recommendations & Follow-Up Care

Based on the lab results, the patient should:

- Follow up with their primary care physician to discuss the abnormal glucose and cholesterol levels.
- Consider lifestyle modifications to improve glucose and cholesterol levels, such as diet and exercise.
- Follow up with liver function tests to monitor the ALT levels.

Specialist Recommendations

- **Endocrinologist:** To discuss the abnormal glucose levels and develop a plan to improve glucose control.
- **Cardiologist:** To discuss the abnormal cholesterol levels and develop a plan to improve cholesterol control.
- **Gastroenterologist:** To discuss the abnormal liver function tests and develop a plan to monitor and manage liver health.

Executive Summary

The patient, Auditor, underwent two lab assessments on 2026-01-10 and 2026-06-10. The lab results suggest potential issues with glucose, cholesterol, and liver function. The patient should follow up with their primary care physician to discuss the abnormal lab results and develop a plan to improve glucose and cholesterol levels. Specialist recommendations include an Endocrinologist, Cardiologist, and Gastroenterologist.
