## Recommendations & Follow-Up Care

- The patient should follow up with their primary care physician to discuss the elevated glucose and cholesterol levels.
- The patient should also follow up with a cardiologist to discuss the elevated cholesterol levels.
- The patient should follow up with a gastroenterologist to discuss the mildly elevated liver enzymes.
- The patient should follow up with a hematologist to discuss the mild anemia.

## Specialist Recommendations

- **Cardiologist:** To discuss the elevated cholesterol levels and potential cardiovascular risk.
- **Endocrinologist:** To discuss the elevated glucose levels and potential diabetes risk.
- **Gastroenterologist:** To discuss the mildly elevated liver enzymes and potential liver disease.
- **Hematologist:** To discuss the mild anemia and potential underlying causes.

## Executive Summary

The patient has elevated glucose and cholesterol levels, mild anemia, and mildly elevated liver enzymes. The patient should follow up with their primary care physician and specialists to discuss these findings and develop a plan to manage their health.
